**Maribor je že evropska prestolnica**

1. 4. 2010 Več kot 400 izdelkov, od tega kar 217 za novo Umetnostno galerijo, je rezultat izrednega svetovnega zanimanja za mariborski natečaj in Evropsko prestolnico kulture. "Evropska prestolnica kulture se je v Mariboru že začela," je dejal mestni arhitekt **Stojan Skalicky**, ...

## Suggestions for cooperation III

We are preparing projects in the following spheres:

- tourism, culture and sport;
- handicapped people (invalids, blinds and deafs);
- sustainable mobility (bicycle routes, environment friendly buses, cards for public transport).

## **Suggestions for cooperation IV**

Our interest is also to connect Maribor to the network EUROCITIES.

In December 2009 we applied for a project FuTUrA (Functional Transborder Urban Areas) within ESPON programme. The functional connected areas in the project proposal were on the axis Trbiž-Villach, Nova Gorica-Gorizia, Maribor-Graz, Gornja Radgona-Radkersburg. In the future Balkan countries could be included in such projects.

# Suggestions for cooperation V

## Programmes

South-Eastern Europe

CULTURE

Exchange3

Research and development (FP7 framework programme)

## **Our wishes and challenges**

- cooperation between all levels of policy:  
national, regional and local
- projects that ensure higher quality of life in the city  
(economic growth, jobs, accessibility, quality of traffic,  
environment and health, security, sustainable  
development)
- strategic approach is necessary
- at the city management we need more experts (for  
mobility management, environment, ICT...) and good  
project managers - cooperation with other institutions  
(University, institutes...) and co-financing from projects

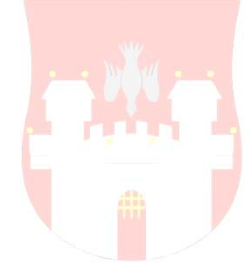

# Our wishes and challenges I

- good communication between municipality, city council and public is necessary
- infrastructure is important, but we mustn't forget about communication and raising awareness, organization and general framework
- we need money (Styria invested €75 million into cycle routes)

**“We have to start today.  
If we will wait for another 10-15 years,  
the problem will be even bigger”**
