

RES in Alpine space – project experience

Alpine Space Forum
Ljubljana, 27th September 2011

Matjaž Gerl, E-zavod

SHARE - Sustainable Hydropower in Alpine Rivers Ecosystems

Alpine Space - a water treasure of Europe

HYDROPOWER vs RIVER ECOSYSTEM

Overcoming the conflict with new approaches and technologies

The purpose of **SHARE** is to develop, test and promote a decision support system to merge, on an unprejudiced base, both river ecosystems and hydropower requirements.

ENERMED – Mediterranean Renewable Energies

RES is a LOCAL THING

GOVERNANCE
NATIONAL \Rightarrow LOCAL

LOCAL RESOURCES

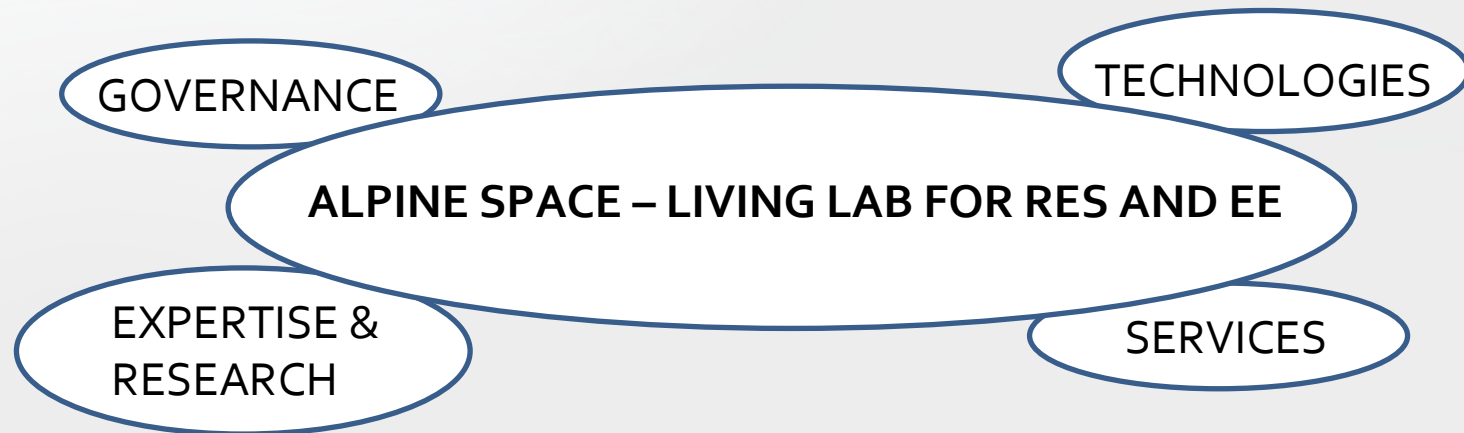

A diagram consisting of two blue curved arrows forming a circle, one pointing clockwise and one pointing counter-clockwise, positioned around the text 'LOCAL RESOURCES'.

The purpose of ENERMED is to improve the governance of RES in Mediterranean regions in the light of sustainable development.

CentraLab – Central European Living Lab for Territorial Innovation

RES – a Potential for Competitiveness of Alpine Space?

The purpose of CentraLab is to spread a new approach to innovation process (user driven innovation) to the area of Central Europe.
