Detailed description of the project						Type of services provided		
<p><b>Project objectives:</b></p> <p>The main objective of the SEAWAYS project was to create a model for an integrated and sustainable development of the tourist sector, strengthening the cooperation and integration of the cross-border regions in the Adriatic area. In particular, the project aimed at:</p> <ul style="list-style-type: none"> <li>• promoting policies for economic development, supporting SMEs and the creation of new jobs in the tourist sector;</li> <li>• increasing mutual knowledge of the Adriatic economic and social situation;</li> <li>• consolidating the exchange of skills concerning business internationalisation processes.</li> </ul> <p><b>Project activities:</b></p> <ul style="list-style-type: none"> <li>• Study on the seaways and commercial routes in the Adriatic basin to promote this common historical and cultural heritage as a common ground for enhanced transnational cooperation activities;</li> <li>• Organisation of workshops and seminars, exchange of good practices and training activities targeted at local stakeholders;</li> </ul>						<p>Organisation of training activities and workshops for the relevant stakeholders.</p> <p>Coordination of the key players in the local tourist sector for the elaboration of innovative tourist offer packages.</p> <p>Promotion activities and dissemination of project results.</p>		

- Development of trans-national pilot actions for the elaboration of innovative tourist offer packages.

**Expected results:**

- Elaboration of a model for an integrated and sustainable development of the tourist sector;
- Study and rediscovery of the historical and cultural heritage of the commercial seaways and seafaring tradition in the Adriatic;
- Improvement of the professional competences concerning innovation, management and planning in the tourist sector.
- Development of a marketing plan, improvement of the quality of the tourist offer and promotion of the economic growth in the target areas.

Detailed description of the project						Type of services provided		
<p>The project promotes the utilization of existing cultural values and tourist potential of target territories creating local identities having as references both promotion and tourism management based on the appeal factor of historical villages, walled cities, castles and cultural sites comprised in the these territories. These factors contribute to the development of the economic potentials of the local economy assuring the highest employment rates and improved living conditions for the population of the target territories.</p> <p>The project supports both the preservation of these areas and the use of historical and cultural determinants in order to promote sustainable tourism as an essential factor in developing urban areas together with their surrounding rural areas.</p> <p>The envisaged activities include: The promotion of the historical villages, fortified cities, cultural sites and cultural itineraries in the target territories; The sensitization of the target area stakeholders and local policymakers/operators to the economic and social advantages that can be derived from creating a network of common experience and by the affiliation to the to-be constituted network of cross-border centres with a high tourist appeal; The management of pilot projects regarding particular territories and itineraries; The development of a institutional training and promotion shared network among cross-border centres with a high tourist appeal; The creation of a series of promotional and</p>						Communication and dissemination of results		

educational activities together with media representatives and tour operators.

The main goal is to strengthen the bond of common origin among Adriatic cities through territorial cooperation, the aim being to create and to put into practice a common cross-border strategy emphasizing local history and heritage, cultural tourism and other factors essential for the economic rebirth of historical centers.

Detailed description of the project						Type of services provided		
<p><b>Project objectives:</b></p> <p>The project objective consisted in pinpointing integrated cross border methods, systems and tools of sustainable management of agricultural and forest resources in the CADSES area, towards a shared carbon balance, taking into account the fundamental function of forests in absorbing and retaining carbon and implementing existing environmental policies according to the State commitments towards the Kyoto Protocol. The project allowed to provide concrete tools for the assessment and improvement of the capability of the grand agricultural and forest resources of the CADSES area, to play a primary role in the global market of the carbon shares, following the application of the Kyoto Protocol.</p> <p><b>Project activities:</b></p> <ul style="list-style-type: none"> <li>• Transnational data collection and identification of CADSES cross-border territorial areas of intensive monitoring in order to determine the balance of carbon;</li> <li>• Analysis of the cross border gaps and support to the description of the carbon cycle in the target areas, in order to improve the analysis of the regional agricultural and forestry resources management;</li> <li>• Carbon cycle evaluation and definition of targets in order to improve management of resources in the cross border CADSES areas and increase carbon credits;</li> <li>• Pilot actions for the application of transnational sustainable management principles of agricultural and forest resources, aimed at supporting the government bodies in the application of the transnational Action Plan delivered in the previous actions;</li> <li>• Dissemination and exploitation for the improvement of agricultural and forestry resources management in the CADSES area.</li> </ul>						<p>Partnership and project activities co-ordination.</p> <p>Technical Secretariat activity (organisation of meetings, events).</p> <p>Accounting, monitoring and reporting.</p>		

**Expected results:**

- Creation of a database on agricultural and forest systems and setting up of models for the public administration to allow a better management of forest and agricultural areas;
- New strategies and technologies to improve the management of agricultural and forest systems in order to obtain the best environmental and economic results and promote sustainable development;
- Common monitoring activities at the transnational level in cross border areas to determine the balance of carbon within an integrated methodology;
- Actions to support the integration process of spatial and rural development at the regional level;
- Best practice exchange concerning the management of closed carbon cycles, which could later be implemented in other EU regions.

Detailed description of the project						Type of services provided		

**Objective of the project**

The project aimed at dealing with the internationally recognized issue of the effects of climate change on alpine tourism, winter tourism and winter sports in some areas of the Alps and all-season tourism in other areas, providing:

- appropriate strategies to ensure a balanced development of alpine tourism
- the preparation of appropriate adaptation policies at the national, regional and local level
- assessment of the economic and social effects of climate change on tourism

**Project activities:**

- Analysis on the impacts of climate change on Alpine tourism;
- Creation of an executive overview of the tourist areas;
- Analysis on adaptation and management strategies in the Alpine region;
- Selection of a set of parameters and identification of common trends in order to develop a strategy;
- Creation of an electronic tool for stakeholders;
- Development of strategies in the pilot areas with a direct involvement of local authorities, stakeholders and the public.

**Expected results:**

- Overview and assessment of possible impacts of climate change;
- Identification of possible adaptation strategies;
- Development of an electronic web-based tool;
- Information, education and communication activities.

Coordination and organisation of transnational meetings among the project partner and set up of a Steering Committee.

Coordination of the project partnership.

Financial controlling and monitoring of progresses.

<p><b>Objectives</b></p> <p>Internationalization of the study program of Adriatic secondary schools</p> <p>Creation of an Adriatic program for students' mobility at secondary school level</p> <p>Creation of an institutional network of Adriatic School Authorities which develops criteria for mutual recognition of secondary school programs and diplomas to increase students' mobility opportunities.</p> <p><b>Project activities</b></p> <ul style="list-style-type: none"> <li>- Creation of KEPASS program for students' mobility at secondary school level for the Adriatic Area</li> <li>- Launch of the first Call for accrediting schools within the KEPASS mobility program</li> <li>- Creation of a tool (the accreditation system) to drive schools towards more competitive and up to date education offer</li> </ul>						<p>Technical assistance to the partnership in project management, meeting organization, internal and external communication, reports.</p>		

and assess it

- Monitoring visits to assess schools for accreditation
- Training workshop for school principals
- Training program for teachers of the accredited schools
- Pilot mobility for aged 17/18 in another Adriatic country for one term
- Definition of and assessment tool to measure the competences acquired by students during mobility
- Horizontal mainstreaming of the KEPASS program
- Presentations of the project results to Decision Makers in the Cooperation Area, EU representatives, EU delegation.

**Results**

- Increased formal, informal and non formal competences in students who participate in the mobility program
- Increased attractiveness and competitiveness of secondary schools accredited in the KEPASS program
- Mutual recognition of vocational diplomas in specific sectors of interest
- Creation of "International Modules" to be then added to the ordinary curriculum of each school receiving accreditation in the KEPASS system

Detailed description of the project						Type of services provided		
<p><b>Project objectives</b></p> <p>The project aims at the development and implementation of operative plans and new tools in order to consolidate and diversify urban and regional economy through the enhancement and tourist promotion of historic, cultural and religious heritage in the partner countries. In particular, the project aims to integrate the religious cultural values in the planning and development processes of urban, rural and peripheral centres of SEE programme area.</p> <p><b>Project activities</b></p> <ul style="list-style-type: none"> <li>• Creation of a religious heritage catalogue and assessment of the development potentials through the realization of a GIS map concerning all the partner regions, good practices and tourist service assets analysis;</li> <li>• Elaboration of a Religious Tourism Common Model (RTCM);</li> <li>• Creation of four Agencies - in Hungary, Romania, Bulgaria and Greece - specialised in religious tourism</li> </ul>						<ul style="list-style-type: none"> <li>• Identification of the touristic potential of the area;</li> <li>• Identification of synergies with other projects;</li> <li>• Involvement of the relevant stakeholders;</li> <li>• Development of ideas and tools (integrated tourist itineraries, participation into the main International fairs) for the religious heritage use in order to foster the involved areas' economic and touristic development;</li> <li>• Individuation of sources of funding for new projects.</li> </ul>		

development;

- Internationalization and marketing promotion of religious touristic products in the South East Europe area, through the definition of touristic itineraries and routes, the participation into International Tourism Fairs and Seminars, the organization of promotional activities addressed to tour operators and religious tourism specialized agencies.

**Expected results**

- Elaboration of a SEE cultural and religious heritage virtual map;
- Elaboration of a Religious Tourism Common Model;
- Design and promotion of religious tourism itineraries;
- Creation of Tourist Agencies specialized in the development of religious tourism;
- Identification of a cross-border route to be proposed to the Council of Europe and included into the European Cultural Routes.

Detailed description of the project						Type of services provided		
<p>SeeNet Programme is based on a network of local authorities from Italy and South-East Europe that cooperate in order to strengthen the governance skills of involved territories, promote sustainable local development and enhance the EU integration process of SEE countries. In order to achieve the Programme objectives, there are foreseen two types of Actions: Horizontal Actions that will involve the whole partnership and Vertical Actions that will involve each Italian partner in a specific thematic to be implemented in specific SEE territories. The Horizontal actions are so divided: Action A - Institutional Building; Action B - Information and dissemination; Action C - Research; Action D - Partnerships between South East Europe Local Authorities. While the Programme will implement nine vertical actions that can be grouped in four thematic: 1 - Valorisation of cultural tourism; 2 - Valorisation of rural areas and natural environment; 3 - SME support and cross-border entrepreneurial cooperation; 4 - Territorial planning and social services.</p>						<p>Technical Partner in the Vertical Actions led by the Autonomous Region Friuli Venezia Giulia and Veneto Region, specifically:</p> <p><b>Vertical Action 3 A Transgrowth - Entrepreneurial Animation for the Transnational Growth of Integrated Local Productive Systems</b> (Led by Region Friuli Venezia Giulia). The Action 3 A general objective is the enhancement of local production systems growth so as to promote economic cooperation between the areas involved. Its specific objective are: increase of the agricultural/food products and wood quality thanks to specific actions and pilots projects performed both at an institutional level and at the level of the economic operators of the main local production chains.</p> <p><b>Vertical Action 1 A Promotion and Enhancement of cultural, historical and environmental heritage in the territories</b> (Led by Veneto Region). The Action aims at promoting and enhancing the value of the involved territories cultural, historical and environmental heritage through common activities focused on territorial marketing and a promotional strategy.</p>

Detailed description of the project						Type of services provided		
<p><b>Project objectives:</b></p> <p>The overall project objective is the establishment and implementation of an effective and coordinated SETA framework, promoting and fostering the institutional cooperation between PEC structures and member states in order to reach the EU's objectives of (i) transparency and information reliability; (ii) develop of an harmonised and efficient institutional framework and (iii) rapid implementation of the transport priority projects. This overall objective could be reached by the implementation of a specific WP1 in compliance with EU recommendations (in particular HLG Report, 2005-2007, EC Comprehensive Monitoring Reports and COM (2008) 125 final). PECs have similar problems above all regarding administration and exchange of information. SEETAC will enable this exchange, in coordination with EC SFC 2007-Electronic Data Exchange project, the identification of common problems and solutions in order to attain the</p>						<p>Project Web site creation and updating.</p> <p>News, Information, external and internal communication, brochure, leaflets, folder, promotional materials.</p>		

common mobility (good, capitals and people) standards for the whole EU territory.

**Project activities:**

- Institutional coordination to build an effective SETA framework and network in compliance with recent EU transport policies (i.e. HLG Report and COM(2008) 125 final);
- Establishment of an institutional and transparent communication system;
- Implementation of a coordinated database management system;
- Definition of multi-modal traffic scenarios and common mobility standards and environmental (EIA & SEA) guidelines;
- Identification of necessary financial resources and financing mechanisms;
- Finalisation of SEE Spatial Planning.

**Expected results:**

- Established transnational transport framework and regular SETA organisational/administrative reports (Operational Manual, Audit / Administrative / Progress / WP Reports);
- Information management system including communication plan and tools; regular meetings of Ministers of Transport, PEC bodies, EC and Donors;
- Electronic database management system including traffic, social, environmental and economic data;
- Multi-modal traffic scenario study identifying good practices and recommendations;
- Common multimodal transport standards and EIA/SEA guidelines;
- Priority project fiches & application documents to be submitted to donors for financing and financial report;
- SEE Spatial Plan / SETA Strategy compatible with the SEETO Action Plan.

These results could be easily transferred to other EU Transport Axis, in particular to Central Axis, where another coincidence of CE Programme eligible area exists.
